Shipping*: _____

* Due to the many service options available, shipping costs can be determined upon completion of work. All outbound shipments from CalChrome will ship via UPS only, **NO** freight collect available. For additional information, please visit www.calchrome.com and click "shipping".

Due to the nature of telephone estimates, the actual plating and/or repair costs may differ from original assessment. For example: Wheels may look to be one piece, but are actually a multi-piece constructed wheel, that will require disassembly and re-assembly. Also, there may be lateral run out that is not visible during inspection without spinning the wheels at speed. If the cost is higher, we will contact you with an exact figure based on our professional examination of the wheels. It is our job as a professional in this field, to best determine all necessary work that needs to be done.

You as the customer ultimately make the decision on how much work is to be performed.

All shipments received by California Chrome Wheel Inc. from outside of the United States, are subject to customs duty, taxes, brokerage and processing fees etc. These fees and taxes are not generated by California Chrome, but by the customs agencies of all involved countries. You the customer are responsible for all fees, duty, brokerages and taxes involved in your transaction with California Chrome Wheel Inc. both on inbound shipment to CalChrome, and outbound shipments to you the customer.

These charges are invoiced to California Chrome from the appropriate customs brokers, which can take as little as two weeks, or as long as two months to receive. At the time of receipt, we will forward these invoices, and request payment from you for these invoices. Please be advised, these charges are the responsibility of you, the customer. Check with your sales consultant for more information.

I have read, and agree to the above disclaimer.
